

RESIDENTIAL TRASH PICKUP

MAYBIN'S TRASH SERVICE

MATERIAL · CAPACITY · PACKAGING · LOCATION · FREQUENCY

Material

Household waste. No wet paint, propane tanks, construction debris, or other [banned items](#).

Recycling: We follow [Hendersonville Transfer Station guidelines](#)

Capacity

Trash: One Maybin's cart

Recycling: Two bags of recycling **placed outside** the can

Packaging

All trash must be bagged and tied. Even with carts, trash must be securely bagged and tied, **especially recycling bags**, to ensure proper handling and reduce spills and injuries. All recycling must be in translucent blue recycling bags, **including cardboard**.

Cardboard must be broken down, cut, and placed in recycling bags to ensure pickup. We will do our best to pick up improperly packaged trash, but recyclables that cannot be pitched into our recycling cages may be thrown away or left behind.

Location

Curbside: For most, this is the "end of the driveway." For condominiums, apartments, and similar residences without a traditional driveway, the curb is defined as "within 3-8 ft of where we can back our trucks."

Frequency

Once per week – Thursday

SPECIAL SERVICES

In-Yard Service

Trash pickup at your house (if our trucks fit and cause no driveway damage) \$13/month

Multiple Capacities

Add as many Maybin's carts as you desire for \$13/month/cart.

Extra recycling can be ordered as well \$5/month/two bags
